

## Letter of confirmation

### Per- and polyfluorinated alkyl substances (PFAS)

The substances mentioned are neither stored nor processed or produced at Schweizer Salinen AG. No substances listed in Regulation (EU) 2019/1021 or Regulation (EU) 2023/915 have been detected in evaporated salt (sodium chloride).

For a representative, homogeneous sample, 1 kg of salt was used in accordance with Regulation (EU) 2022/1428. The analysis for the following derivatives was carried out in an ISO/IEC 17025:2017 accredited analytical laboratory:

- **Perfluorooctane sulfonic acid (PFOS)**  
(sum of linear and branched stereoisomers)
- **-Perfluorooctanoic acid (PFOA)**  
(sum of linear and branched stereoisomers)
- **Perfluorononanoic acid (PFNA)**  
(sum of linear and branched stereoisomers)
- **Perfluorohexane sulfonate (PFHxS)**  
(sum of linear and branched stereoisomers)
