

Letter of confirmation

Residual Solvents

All table salts produced by Schweizer Salinen AG meet the requirements of Directive 2009/32/EC on extraction agents authorised for use in the manufacture of foodstuffs or food ingredients, as these are excluded by the manufacturing process.

Due to this aspect, salts for pharmaceutical use also comply with the requirements regarding residual solvents with regard to Guideline ICH Q3C (R9) or the Annexes CPMP/ICH/283/95 Impurities: Guideline for residual solvents & CVMP/VICH/502/99 Guideline on impurities: residual solvent and according to USP-NF/PF <467> residual solvents, as all potential contaminants can neither be used nor formed in production.
